DISCOVER YOUR NEXT EVENT DESTINATION

A community-driven web platform to find music, sports, workshops, gaming & arts events near you.

20	5	7	6
LIVE EVENTS	CATEGORIES	CITIES	FREE EVENTS

Abstract

The Discover Your Next Event Destination is a fully responsive web platform where users can browse, search, filter, and save local events across India. Built with HTML5, CSS3 & Vanilla JavaScript, it features real-time filtering, category browsing, a modal detail view, Google Calendar integration, and localStorage-powered saved events with dark/light theme toggle.

Responsive UI | Dark/Light Theme | Async JS | Accessibility | Form Validation

System Architecture

HTML5 — Structure → CSS3 — Styling → JS ES6+ — Logic → Storage — localStorage

CSS Grid | Flexbox | Async/Await | Promises | Google Calendar API

Event Categories Covered

- Music — Festivals, Concerts, DJ Nights
- Gaming — Esports, Expos, VR Demos
- Sports — Marathons, Cricket, Kabaddi
- Education — Workshops, Bootcamps

CO-WISE IMPLEMENTATION

CO1 Internet Fundamentals, HTML & Introductory CSS

- Semantic HTML5 structure with ARIA roles & landmarks
- Responsive Dashboard & Hero section design
- CSS Flexbox / Grid layouts throughout the app
- Anchor links, sticky header, semantic footer

CO2 JavaScript Programming Essentials & CSS Advanced

- CSS custom properties & responsive media queries
- CSS animations — fadeUp keyframes, shimmer loader
- Form elements: fieldset, legend, select, number input
- Semantic <table> in event detail modal

CO3 JS Fundamentals, Objects, Arrays & Callbacks

- Array of 20 event objects — rich data structure
- .filter(), .sort(), .forEach() with arrow functions
- Template literals, prototype inheritance pattern
- Hex literals (0x64) & scientific notation (3.6e6)

CO4 JavaScript Interactivity, DOM & Events

- Dynamic card rendering & modal DOM manipulation
- Event listeners — click, keydown, submit, keyboard
- localStorage for saved events & theme persistence
- Toast notifications & skeleton loader feedback UI

CO5 Advanced Web Development & Deployment Readiness

- ES6 Modules with type='module' script tag
- Async/await with simulated Promise-based fetch
- Try-catch exception handling throughout app
- Form validation with live error messages
- CORS awareness logged to developer console
- SEO meta tags, aria-live regions, focus management

FEATURED EVENTS

Music	Education	Sports	Gaming
Sunburn Festival	TechSpark AI Workshop	Mumbai Marathon 2025	Esports Championship India
Mumbai · Sep 12	Bengaluru · Sep 28	Mumbai · Nov 9	Mumbai · Nov 26
₹1500	FREE	FREE	₹299

Conclusion & Future Scope

This project demonstrates core web development concepts — responsive design, DOM manipulation, async programming, form validation, and browser storage APIs — implemented in a real-world event discovery platform. Future enhancements include a Node.js + Express.js backend, MongoDB database, RESTful APIs, user authentication, payment gateway integration, and AI-driven event recommendations, making it fully production-ready.
